

Exp 4 create a snapshot and cloning of a VM

Step 1:-

Step 2:-

Step 3:-

Clone Virtual Machine Wizard

Clone Source
Which state do you want to create a clone from?

Clone from

☒ The current state in the virtual machine
Creating a linked clone from the current state will create a new snapshot.

☐ An existing snapshot (powered off only):
Snapshot 1

Step 4:-

Clone Virtual Machine Wizard

Clone Type
How do you want to clone this virtual machine?

Clone method

☐ Create a linked clone
A linked clone is a reference to the original virtual machine and requires less disk space to store. However, it cannot run without access to the original virtual machine.

☒ Create a full clone
A full clone is a complete copy of the original virtual machine at its current state. This virtual machine is fully independent, but requires more disk space to store.
